Legend and Explanations

The table shows the Bluetooth mobile phones which have been tested, sorted by Brand, Model and Software

For each Software version, the compatibility with the different BMW car phone systems is displayed

The compatibility is described using a simple color scheme. It is displayed, from which production date the compatibility with the BMW system is ensured. Dates in brackets display a phone/software which may work, but is not officially supported.

The following table shows the conversion between release date (used in the compatibility matrix), and device part-nr. (which can be read from the tester)
